

# Activity File: Security Challenge #2 - Defending the Wall

---

In this activity, you will look at various defense strategies that security professionals can use to harden an insecure login and prevent breaches.

- BitCoin Dating Exchange is now worried about the security of their website and would like you to propose mitigation strategies to defend against the attacks that you've listed in the previous activity.

## Instructions

In the same groups, use your list of potential attacks from the previous activity to develop a list of at least 10 strategies to mitigate the website's risk.

**Hint:** A single mitigation may be able to defend against multiple attacks.

Be prepared to share your answers!
